Calibration Notes for 2006-2009 Honda Civic Si
AccessPORT Calibration Anti-Theft Mode v103

COMPATIBLE

Compatible with **AccessPORT**

Calibration Name: Anti Theft Mode v103

Latest Calibration Rev: 1.03

Calibration and Calibration Notes Updated: 10/30/09

Description: Anti-Theft Mode v103 - Intended for 2006-2009 USDM/CDM Honda Civic Si. This map was designed to not allow the vehicle to start.

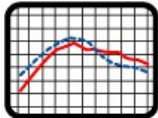

HARDWARE

Hardware Requirements: Stock or modified vehicle. **Caution:** Bypassing the coolant lines from your throttle body assembly will likely cause fuel trims to be excessive (+8 to +11%), more information can be found [here](#).

FUEL REQUIREMENTS

Fuel Requirement: Minimum 91 octane.

POWER OUTPUT

Power Output: Vehicle was not tested for power with this calibration.

Revision Notes:

1.03 - Updated to match updated performance maps.

1.02 - Updated to match updated performance maps.

1.01 - 2007-2009 Civic Si calibrations updated to effectively remove speed limiter. The speed limiter does not exist on the 2006 Civic Si.

1.00 - Original calibration. This map is to not allow the vehicle to start.

Additional Notes:

This calibration is designed to prevent the vehicle from starting.

CEL Codes Defeated [WHEN USING AS REFLASH MAP] (** means new to latest revision):
